Revealing the Goddess Within

A FEW WORDS ABOUT GODDESS WITH LISA...

Namaste and Welcome to The GODDESS - Getting Present

So often I am asked, "what is the Goddess?" The Goddess lives in every being. She is our infinite, natural, divine self. She is alive in the simplest gestures of loving kindness and in the ways we respect ourselves and others. The Goddess can often be hidden by the illusions and distractions that so many of us are caught up in.

Attachments to preferences, likes and dislikes, judgments, addictions and fears, keep us from connecting with our innate, bountiful, life-giving energy. The good news, however, is that the Goddess energy can never completely disappear. She is the sacred space in all of us and the only distance between this boundless beauty of ultimate compassion and wisdom is our own ignorance. We can relearn who we truly are as women without forcing blame or resentment on anyone else.

Through the practices of yoga, healing sharing circles and self-assessment, we begin to bridge this gap.

The search for the Goddess leads us all to one place, the home within each of us. For some, our true nature may seem foreign at first, but within moments of recognizing our natural abilities, we become more free and energetic.

"You can put your knees down, just don't put yourself down."
